

Organisch-Chemisches Kolloquium

Sommersemester 2023

jeweils Montags, 11:15 Uhr, Raum S06 S00 B29

1) 17. April 2023

Dr. Bernd Schmidt, HHU Düsseldorf

“Mechanoresponsive Metal-Organic Cages“

1) 08. Mai 2023

Prof. Guillaume Delaittre, Universität Wuppertal

“Polymers from natural raw materials and functional polymer nanostructures by efficient processes “

2) 22. Mai 2023

Prof. Christof Sparr, Universität Basel

“Control over Twofold and Higher-Order Stereogenicity“

3) 10. Juli 2023

Prof. Anke Krüger, Universität Stuttgart

“News from the Carbon Universe: Functionalized carbon nanomaterials for applications in biomedicine, quantum technology and catalysis“
